## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 2, 3, 6, 8-10, 13 and 16 are rejected under 35 U.S.C. 102(e) as being anticipated by Marino et al., Patent No. 6,259,862.

As per claims 2, 3, 6, 8, 9, 10 and 13, Marino discloses in Figs1 and 3 a multifunctional device and method thereof comprising a surface 24 readable as a platform, a lighting element 34 disposed on the platform, the lighting element having a lighting function 34 and having at least one non-lighting function 32, and at least one processor 50 for controlling the lighting element to provide the lighting function and the non-lighting function, wherein the processor generates a PWM signal (see Col. 8, lines 37-39) to control the lighting function; said the lighting function 34 being provided by LEDs; said

non-lighting function 32 positioning device and being a sensing function provided by a light-sensing photocell which is an emitting function.

As per claim 16, Marino discloses the claimed invention substantially as explained above. Further, Marino discloses the first element as LEDs 34, and the second element as light-sensing photocell 34.

***Allowable Subject Matter***

Claims 4, 5, 7, 11, 12 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 15 and 17-20 are allowed.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2821

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
